TEAK WOOD

www.mastercomholding.com

Teak wood is prized for its durability and resistance to water, rot, and insects, making it ideal for various applications, particularly those involving outdoor exposure. It's a popular choice for outdoor furniture, boat building, decking, and flooring. Our supply is direct from Brazil

How fast does teak grow?

Teak is one of the faster growing tropical hardwoods, growing at a rate of about half an inch per day. It takes at least 25 years to grow into a mature tree ready to be harvested.

What type of wood is teak?

Teak is a close-grained type of hardwood. It is widely considered to be the 'king of woods' and makes excellent outdoor furniture due to its water-resistance, durability and beauty.

How hard is teak wood?

The hardness of wood is determined using the Janka Wood Hardness Scale which measures the force needed to embed a 11.28mm / 0.444in steel ball into the wood. Teak appears on this scale with a Janka rating of 1000-1155, which is harder than white pine, chestnut, poplar, cedar and mahogany.

Is teak durable?

Teak is widely considered to be one of the most durable woods. Teak is close-grained and high in minerals and natural oils so it's strong, durable, and virtually impervious to all weather extremes and rotting.

LOGS (ROUND)

1

80 - 90 cm

Minimum monthly volume = 18 m³

2

90 - 99 cm

Minimum monthly volume = 18 m³

3

100 - 109 cm

Minimum monthly volume = 18 m³

4

110 - 119 cm

Minimum monthly volume = 18 m³

5

120 - 129 cm

Minimum monthly volume = 18 m³

6

130 - 139 cm

Minimum monthly volume = 18 m³

7

140 - 149 cm

Minimum monthly volume = 18 m³

8

150 + cm

Minimum monthly volume = 18 m³

Square Teak

9

3 x 4 m - Grade A

Minimum monthly volume =
28 - 30 m³

10

3 x 4 m - Grade B

Minimum monthly volume =
28 - 30 m³

11

3 x 5 m - Grade A

Minimum monthly volume =
28 - 30 m³

12

4 x 5 m - Grade A

Minimum monthly volume =
28 - 30 m³

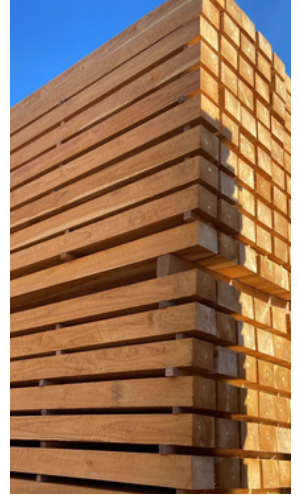

Logs (Round)

Minimum monthly volume = 18 m3
FOB Timber Merchant, Brazil
